

Nature

Sharrel Dennis – VII

Nature is a beautiful thing created by God. It helps us in many ways. Nature is a place filled with greenery. The trees, the mountains, the sky, the rivers and so many other things are included in nature. Everything is helpful in nature.

For me nature is the best thing I have ever seen. It helps us so many times, like the medicinal values of the trees and it can also be harmful like the poisonous fruits also. Nature is just like us human beings, we have some good qualities and some bad qualities. There is a phrase 'nobody and nothing is perfect in this world', this means that nothing is always correct or good. In a similar way, nature is unpleasant sometimes, but not always. For example – when a person starts climbing a mountain he finds it very difficult, but after climbing the mountain he finds everything so beautiful. This is nature, it has so many things, so many amazing and unbelievable things to show but people don't have time to explore it. If we try to explore nature, then only we will know that nature is something that cannot be described.
